Content Practice A

LESSON 1

Describing Weather

Rain	Snow	Sleet	Hail
Cloud droplets Warm Raindrops Warm	lce Cloud crystals droplets Cold Snowflakes	Ice Cloud droplets Warm Raindrops Cold	Ice crystal Cloud droplet Hail Warm

Directions: Use the diagram to answer each question.

Question	Rain	Snow	Sleet	Hail
What form is the water in when it is in the clouds—liquid or solid?				
What is the air temperature near the clouds—warm or cold?				
What is the air temperature near Earth's surface—warm or cold?				
What is the form of precipitation that falls—liquid or solid?				
How are rain, snow, sleet, and hail part of the water cycle?				
What role does temperature play in the type of precipitation that develops?
