

Key Concept Builder

LESSON 3

Weather Forecasts

Key Concept What instruments are used to measure weather variables?

Directions: Use the map to answer each question.

- Which two types of fronts are shown on the weather map?

- What type of air pressure system is located in the center of the country?

- What pattern do the numbers on the map make?

- Where are areas of high pressure located?

- Where might a precipitation symbol be placed on this map?

- How can this map be used to forecast the weather?
